

Fast, Easy and Reliable Methods for Electronic Visit Verification

SMARTPHONE APP

The Vesta EVV Mobile App makes it quick and easy for Service Attendants and CDS Employees to clock in and out using their own smartphone.

HOME LANDLINE

The Vesta EVV Home Landline Telephone Interactive Voice Response (IVR) system provides a reliable way for Service Attendants and CDS Employees to clock in and out a home landline telephone.

ALTERNATIVE DEVICE

Vesta EVV Alternative Devices are innovative electronic devices that allow Service Attendants and CDS Employees to clock in and out when the Vesta Mobile App or home landline is not available.

Vesta EVV offers three dependable, accurate, and user-friendly solutions to verify service delivery and comply with EVV requirements.

Vesta® EVV

Vesta Mobile

INCREASED AUTO-VERIFICATION

Vesta Mobile App users averaged an 82 percent auto-confirm rate in January 2019.

PRECISE TIME & LOCATION

It only records the location where the Service Attendant or CDS Employee clocks in and clocks out. It does not track the user during the visit.

EFFICIENCY

It offers efficient data entry with fewer errors. Service Attendants and CDS Employees may view their schedules before starting their shift.

REMINDERS

Service Attendants and CDS Employees are reminded to clock out of their shift to help them avoid going over scheduled hours.
